Objective

Flutter Mobile Engineer with 4 years of experience shipping production iOS and Android apps live on the Play Store and App Store. I own the full mobile lifecycle — architecture, state management, CI/CD, and store deployment. Strong in real-time systems (chat, streaming, calling), Firebase, and advanced state management (BLoC, Riverpod, Provider). Proven track record collaborating with international teams across healthcare, travel, logistics, fitness, and social domains.

Work Experience

Flutter Mobile Engineer

Maahey Technologies, Inc | Remote | **Aug 2025 – Present**

- Shipped **UR'CHOICE** social platform with **real-time chat**, **audio/video calling**, **live streaming**, and geolocation. Live on the Google Play Store. **End-to-end ownership**.
- Built **real-time messaging** with Firebase Firestore, presence indicators, media sharing, and delivery receipts.
- Integrated **Agora SDK** for peer-to-peer and **group calling** with background handling and adaptive bitrate.
- Developed live-streaming **monetization**: superchat, virtual coin economy, audience gifting.
- Implemented **Google Maps** with live location, proximity-based discovery, and country filtering.
- Refactored legacy codebase, resolved production crashes/ANRs, and established code review standards.

Flutter Mobile App Developer

Techticks | Gujranwala | **Mar 2025 – Jul 2025**

- Delivered production **Android/iOS** apps for a **multi-module** travel booking platform, including flights, hotels, tours, and visas.
- Architected a flight booking engine with **real-time search**, fare comparison, multi-city routing, and seat selection.
- Built a **hotel reservation system** with availability calendars, map-based discovery, **real-time inventory sync**, and offline caching.
- Developed a visa module with multi-step forms, document upload/compression, **OCR-ready** handling, and progressive form saving.

- Designed an in-app **admin dashboard** for flight inventory, hotel partnerships, visa reviews, and booking analytics.
- **Orchestrated 5+** third-party APIs, including aviation GDS, hotel aggregators, and visa services. Error handling, retry logic, and token refresh.
- Engineered **BLoC pattern** with dependency injection for scalable state management.
- Built production AAB/IPA releases. QA via Firebase App Distribution and TestFlight.

Full Stack Mobile App Developer

Bytes Software House | Gujranwala | **Apr 2023 – Dec 2024**

- Owned mobile development for 3 production apps in logistics and healthcare. **Scalable state management** and **Firestore integrations** serving thousands of active users.
- Designed Firebase backend architecture, Auth, Firestore schemas, Cloud Functions, and FCM push notifications. **Real-time sync** and offline resilience.
- Optimized performance via image compression, lazy loading, and **DevTools** profiling. Reduced bundle size and cold start latency.
- Established **CI/CD** pipeline with GitHub Actions and **Codemagic**. Automated build, test, and distribution cut release cycle time, eliminating manual errors.
- Conducted code reviews and mentored junior developers on Flutter best practices, state management, and automated testing.

Flutter & Android Developer Intern

Abiding Tech | Gujranwala | **Jul 2022 – Aug 2022**

- Assisted in Android app development using **Java** and **Android SDK**.
- Worked on UI implementation, **bug fixes**, and performance improvements.
- Participated in code reviews and learned version control **workflows** with Git.
- Collaborated with senior developers on feature planning and sprint tasks in an agile environment.
- Gained hands-on experience with XML layouts, RecyclerViews, and API integrations.

Projects

PILATIX

Fitness, Workout & E-Commerce Platform

Flutter Mobile Engineer | End-to-End Ownership

[Google Play](#) | [App Store](#)

- Delivered a **dual-purpose fitness and e-commerce app** for iOS and Android. Complete mobile architecture, Shopify API integration, and real-time workout tracking. Released on both stores.
- Designed a **flexible onboarding system** for existing purchasers and free users. Seamless registration, personalized workout plans without purchase barriers.
- Integrated **Shopify Storefront API and webhooks** to sync product inventory, order history, and customer profiles. Unified fitness-and-commerce experience.
- Built **real-time exercise monitoring** with rep counting, rest timers, and progress persistence via Firebase Firestore. Resume workouts across devices instantly.

- Implemented an **admin dashboard** for content managers to publish workouts, schedule programs, and track user engagement metrics.
- Optimized UI/UX for **high-retention fitness workflows**, custom animated timers, achievement badges, streak tracking to drive daily active usage.

UR'CHOICE

Social & Live Streaming Platform

Flutter Mobile Engineer | End-to-End Ownership

[Google Play](#)

- Architected and shipped a **full-scale social platform** for Android and iOS from zero to production. Owned system design, API contracts, Firebase backend, and store deployment.
- Built a **real-time messaging system** with presence indicators, media sharing, and delivery receipts using Firebase Firestore and Cloud Functions. Sub-second latency at scale.
- Integrated **Agora SDK** for peer-to-peer and group audio/video calling. CallKit integration, background handling, and adaptive bitrate streaming for low-bandwidth users.
- Developed a **live-streaming monetization module**, real-time superchat, virtual coin economy, in-app purchases, and gift animations. Audience-to-creator revenue.
- Implemented **Google Maps** with live location updates, proximity-based user discovery, and country-based filtering to drive engagement and retention.
- Designed **offline-first caching** and optimistic UI updates. Core chat and profile features are functional during intermittent connectivity.

MOSHARRAQ

B2B & B2C Salon Booking & Business Management Platform

Flutter Mobile Engineer | End-to-End Ownership

[App Store](#)

- Shipped a **multi-role** Flutter app serving B2C consumers and B2B business owners on iOS. Distinct navigation flows, permission models, and UI states in a single codebase.
- Built a **customer discovery engine** with Google Maps, geolocation-based salon search, service filtering, real-time availability, and one-tap booking with automated confirmations.
- Developed a **business owner portal**, salon registration, service catalog management, dynamic pricing, staff scheduling, and a real-time booking calendar with push alerts.
- Implemented an **employee management subsystem**, role assignment, booking performance tracking, and hierarchical staff permissions.
- Integrated **REST APIs** for booking orchestration, payment status tracking, and SMS/email notifications. Ensured transactional consistency across mobile clients and backend.
- Deployed and maintained **iOS production release** via App Store Connect. Managed code signing, TestFlight beta testing, and post-launch crash monitoring with Firebase Crashlytics.

Skills

Language & Frameworks

Dart • Flutter 3.x • Provider • GetX • BLoC • Riverpod

Testing & Quality

Unit, widget, and integration testing • DevTools performance profiling • Bug triage & release sign-off

DevOps & Release

CI/CD via GitHub Actions • CodeMagic • APK/IPA builds • Firebase App Distribution • Google Play / App Store uploads.

Backend & Cloud

Firebase (Auth, Firestore, Functions) • RESTful APIs • Laravel APIs • Secure environment management • Supabase

Performance & Security

DevTools frame-rate & memory tuning • ProGuard / R8 app-size reduction • Secure key storage

Certificates

AppTech Gujranwala
Gujranwala, Pakistan

Certification in Android Development

Achieved: 2020

Education

Virtual University of Pakistan

Bachelor's in software engineering,

Graduated: **2023**

GIFT COLLEGE GUJRANWA

FSC Pre-Engineering,

Graduated: **2019**
